Driving Digital Transformation: How PetaBytz Helped Unify Systems and Revolutionize Customer Experience

Overview

One of our clients, a distinguished Media and Advertisement services provider operating within the USA faced multifaceted challenges in managing customer orders across diverse business segments.

Challenges

- The company struggled with customer order management across different business segments.
- The salesforce sales process was not aligned with the company's actual business cycle.
- Our client, a well revenue oiled organization had all the big tools, but the systems were not unified thus the overall end-to-end state or big picture was missing which was the need of the senior stakeholders.
- Revenue Realization and Sales commission were distorted and were still done manually in Excel sheets by the finance.

Solution

- We documented both the current and future states of Salesforce, ensuring a comprehensive understanding and future reference.
- Developed an integration strategy that covered our current and future integration needs, ensuring a cohesive approach for seamless operations.
- Implemented strategies to boost Salesforce adoption and captured crucial data points essential for revenue integration.
- We segmented accounts based on various parameters such as customer types (Advertisers, Agencies, Rep Firms), geographies, and historical interactions for targeted approaches.
- Our team established a robust integration strategy that revolved around data, incorporating Account Master Data Management (MDM) and leveraging ETL for comprehensive management.
- We tailored the sales process to specifically align to client's unique business requirements, ensuring a seamless customer journey from sales to service.
- Successfully integrated systems to automate revenue realization processes, thereby enhancing operational efficiency.

Benefits

- **Enhanced Inventory Management:** Notable reductions in inventory holding costs coupled with remarkable improvements in order fulfillment rates.
- **Elevated Customer Engagement:** Unified customer interaction insights led to superior engagement and service delivery standards.
- **Augmented Sales Efficiency:** Marked improvements in sales operation efficiency and significantly reduced turnaround times for customer quotations.
- **Empowered Data-Driven Decision Making:** Augmented decision-making prowess based on real-time data insights.

Conclusion

- PetaBytz's Salesforce intervention transformed the operational landscape of the leading Media and Advertisement services provider, ensuring efficiency, cohesiveness, and actionable insights across their diverse business segments.
